

RESTRICTED SUBSTANCE LIST (RSL)

January 2026 | 26th Edition

Introduction

The Restricted Substance List (RSL) was created by a special working group of the American Apparel & Footwear Association (AAFA). This RSL is intended to provide apparel and footwear companies, and their supply chain partners, with information related to regulations and laws that restrict or ban certain chemicals and substances in finished home textile, apparel, footwear, and related accessory products (such as travel goods) around the world.

The RSL was developed to serve as a practical tool to help those individuals in textile, apparel, and footwear companies, and their suppliers, responsible for environmental compliance throughout the supply chain, to become more aware of various local, national, and international regulations governing the amount of substances that are permitted in finished home textile, apparel, footwear, and related accessory products.

The RSL is updated on a regular basis and will be supplemented with additional resources to help officials in these companies undertake responsible chemical management practices in the aforementioned finished products.

RSL Methodology

The RSL includes only those materials, chemicals, and substances that are restricted or banned in finished home textile, apparel, and footwear products because of a regulation or law. In each case, the RSL identifies the most restrictive regulation, current as of the date of publication.

The RSL does not include regulations that restrict the use of substances in production processes or in the factory; rather the focus is on whether or not the substance can be found in finished home textile, apparel, and footwear products at a certain level.

Structure

For each substance the RSL identifies the following features:

1. CAS number
2. Common chemical or color name
3. Information on the Restriction/Limit on Final Product or Tested Component
 - a. Restriction Level
 - b. Country/Jurisdiction where that Restriction/Limit is found
 - c. Test Method
 - d. Other countries/jurisdictions that maintain equal or less restrictions
 - e. Comments (if applicable)

Scope

The RSL is not intended to address product safety regulations outside the chemical management area – such as Consumer Product Safety Commission (CPSC) regulations related to small parts. Moreover, it is not structured to cover toys, automotive textiles, or other industrial textiles. This list does not include restrictions related to the use of substances in packaging or related materials.

The following legislation is not listed because there are no regulatory concentration limits, but which may warrant evaluation for applicability:

- The U.S. EPA, following the Montreal Protocols, promulgated legislation on ozone depleting compounds. Class I and Class II listed chemicals used in the process of manufacturing products or product packaging require special labeling, as detailed in the regulation. Residuals of the chemical components in the product or package are not necessary to trigger the requirement. Minor usage in textiles as a spot cleaner is acceptable.
- California Proposition 65 requires a “clear and reasonable” warning label for all products sold in the state of California containing one or more chemicals known to the state to cause cancer or reproductive toxicity (see [list](#).) Labeling requirements are dependent on consumer exposure to the chemical (measured in micrograms (µg) / day) not the concentration in the product. To comply with the law, manufacturers must either ensure that consumer exposure to regulated chemicals in their products does not exceed the established safe harbor levels or label their products.

AAFA’s Guidance on Proposition 65 Labeling and Best Practices can be accessed [here](#).

Technical Notes

Chemical nomenclature can take several forms. It is the responsibility of the user to verify synonyms of any regulated chemicals referenced.

It is possible that regulated substances may be present in raw materials below the levels that require reporting on Safety Data Sheets (SDS). Care should be taken to verify the presence of all regulated substances regardless of the concentration.

This list represents the most stringent known and applicable standards relevant to the apparel and footwear industry at the time of publication; any inaccuracy or omission is not the responsibility of AAFA.

About AAFA

The American Apparel & Footwear Association (AAFA) is the national trade association representing apparel, footwear and other sewn products companies, and their suppliers, which compete in the global market. Representing more than 1,100 world famous name brands, AAFA is the trusted public policy and political voice of the apparel and footwear industry, its management and shareholders, its more than 3.6 million U.S. workers, and its contribution of more than \$523 billion in annual U.S. retail sales.

AAFA stands at the forefront as a leader of positive change for the apparel and footwear industry. With integrity and purpose, AAFA delivers a unified voice on key legislative and regulatory issues. AAFA enables a collaborative forum to promote best practices and innovation. AAFA's comprehensive work ensures the continued success and growth of the apparel and footwear industry, its suppliers, and its customers.

Acknowledgements

The AAFA gratefully acknowledges the support and contribution of the past and present members of the RSL Task Force in developing the RSL. The current members of the RSL Task Force are listed below.

RSL Task Force:

Jennifer Barbarisi, North America Regulatory and Compliance Manager, TÜV Rheinland

Marion Süße-Bouerebrab, Ph.D, Senior Chemical Expert - Product Compliance and Environment, HUGO BOSS

Henry Boyter, Ph.D, Director of CESTAB, Center for Environmentally Sustainable Textile and Apparel

Businesses Sean Cady, Vice President, Global Sustainability, Responsibility and Trade, VF Corporation

Harsha Chenna, Senior Director, Global Product Stewardship, VF Corporation

Gamma Cheung, Ph.D, Manager, Product Stewardship Asia, Kontoor Brands

Brenda Chiu, Technical Manager, SGS

Debbie Chronicle, Compliance Specialist, BBC International LLC

Lisa Clerici, Senior Manager, Global Restricted Substances Compliance, Under Armour, Inc.

Antonio Cortés Fuertes, Sustainability, Inditex S.A.

John Gerringer, Analytical Director, Eurofins MTS

Alicia Gibreal, Senior Paralegal – IP and Compliance, The Buckle, Inc.

Anna Gonzalski, Senior Technical Manager, Hohenstein

Jamie Griggs, Director of Business Development, Hohenstein

Jill Grosskopf, Senior Global Consulting Specialist, Bureau Veritas Consumer Products Services

Judi Haber, Technical Manager CRS, UL Solutions

Debbie Hodgson, Senior Technical Manager, SGS

Meg Hughes, Senior Global Consulting Specialist, Bureau Veritas Consumer Products Services

Pratik Ichhaporia, Ph. D., Technical Services Vice President North America, Eurofins Consumer Product Testing

Deepak Jadhav, Global Director of Product Chemistry, New Balance Athletics, Inc.

Ken Kaiser, Platform Leader, Clinical Performance Textiles, Standard Textile Co., Inc.

Sandeep Khatua, Ph. D, Global Technical Director, TÜV SÜD America Inc.

Serge Léon, Chemicals Consultant, MODINT

Kathy Leung, Ph.D, Senior Technical Director, Global Softlines Technical Services, Intertek

Maria Morera Castro, Policy Team, Inditex S.A.

Regina Quimby, Director of Global Product Integrity and Global Compliance, Fanatics Inc.

Pankajkumar Sarda, Director, Global Softlines Technical Services, Intertek

Jorge Sifuentes, Director, Product Integrity, Carter's, Inc.

Gregory Sperla, Partner, DLA Piper LLP

Nathaniel Sponsler, Director, AFIRM

Hing Fai Hermond Sum, Senior Director – Quality and Compliance, Centric Brand International (Hong Kong Limited)

Steffen Tuemptner, Chemical Expert, TUV Rheinland

James Wilson, Partner, Webster, Chamberlain, and Bean

Min Zhu, Ph. D, Senior Director, Technical Services and Operations, SGS

Hugh Webster, Partner, Webster, Chamberlain, and Bean

DISCLAIMER

NOTE: This Restricted Substance List (“RSL”) is provided by the American Apparel & Footwear Association (“AAFA”) for informational purposes only. This list represents the known and applicable standards at the time of publication; any inaccuracy or omission is not the responsibility of AAFA. Determination of whether and/or how to use all or any portion of this RSL is to be made in your sole and absolute discretion. Prior to using this RSL, you should review it with your own legal counsel. No part of this document constitutes legal advice. Use of this RSL is voluntary.

AAFA does not make any representations or warranties with respect to this RSL or its contents. The RSL is provided on an “AS IS” and on an “AS AVAILABLE” basis. AAFA HEREBY DISCLAIMS ALL WARRANTIES OF ANY NATURE, EXPRESS, IMPLIED OR OTHERWISE, OR ARISING FROM TRADE OR CUSTOM, INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY, NONINFRINGEMENT, QUALITY, TITLE, FITNESS FOR A PARTICULAR PURPOSE, COMPLETENESS OR ACCURACY.

TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAWS, AAFA SHALL NOT BE LIABLE FOR ANY LOSSES, EXPENSES OR DAMAGES OF ANY NATURE, INCLUDING, WITHOUT LIMITATION, SPECIAL, INCIDENTAL, PUNITIVE, DIRECT, INDIRECT OR CONSEQUENTIAL DAMAGES OR LOST INCOME OR PROFITS, RESULTING FROM OR ARISING OUT OF A COMPANY’S OR INDIVIDUAL’S USE OF THE RSL, WHETHER ARISING IN TORT, CONTRACT, STATUTE, OR OTHERWISE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Commonly Used Units, Symbols, and Terms

ppm = parts per million

ppb = parts per billion (equivalent to 1000 parts per million)

mg/kg = milligrams per kilogram (equivalent to ppm)

µg/kg = micrograms per kilogram (equivalent to ppb)

µg/cm²/week = micrograms emitted per square centimeter of material over a week

< = less than

> = greater than

≤ = less than or equal to

≥ = greater than or equal to

Σ = sum of

Not Detected = below the industry-specified testing method limit

Prohibited = shall not be used (should therefore not be detected)

RSL Structure

The AAFA RSL is split into 16 categories and 3 appendices, as follows:

APEO AP; Arylamines; Dioxins and Furans; Disperse Dyes; Flame Retardants; Formaldehyde; Heavy Metal (Extractable); Heavy Metal (Soluble); Heavy Metal (Total); Miscellaneous; Organotin Compounds; PAH; Pesticides; PFAS; Phthalates; Solvents; Appendix I - Updated SVHC; Appendix II - US States; Appendix III: Labeling.

RSL 26 has further been amended to include a chemical/CAS number search function and an additional tab containing all RSL chemicals, restrictions, test methods, etc.

Chemical Program Best Practices

To comply with due diligence requirements, document verification is the most effective way of supporting compliance with these legal requirements. Examples include, but are not limited to, declaration of none-use or specific compliance certificates of used chemicals.

AP and APEO							
CAS Number	Chemical Name	Restriction /Maximum Limit on Final Product or Tested Component	Country	Regulation	Test Method	Other Countries, U.S. States that also Regulate this Substance	Comments
All CAS of isomers of NP	Nonylphenol C ₆ H ₄ (OH)C ₉ H ₁₉	Taiwan - sum of NP and NPEO <1000 ppm; South Korea - sum of NP and NPEO <100 ppm for children <13 years old EU, Switzerland, Turkey - NPEO < 100 ppm (textile articles intended to be washed);	Taiwan, South Korea	Taiwan CNS 15290 (for all textile products) Korea KC Mark	EN ISO 21084:2019		Nonylphenol is included in the REACH Candidate list. It is also included in annex XVII entry 46 for substances and mixtures (textiles and leather processing). Not for articles.
All CAS of isomers of NPEO	Nonylphenol ethoxylates (C ₂ H ₄ O) _n C ₁₅ H ₂₄ O		Taiwan, South Korea, EU	European Union REACH Regulation (EC) No 1907/2006 Annex XVII entry 46a and European Union REACH Regulation (EC) no. 1907/2006 Candidate List	BS EN ISO 18254-1:2016 Textiles- Methods for the Detection and Determination of alkyl phenol ethoxylates APEOS BS EN 18218-1:2023 Leather - Determination of ethoxylated alkylphenols (APEO)		REACH Annex XVII entry 46a is applicable to textile articles which can reasonably be expected to be washed in water. Second hand textile articles or articles made of 100% recycled content are exempt
All CAS of isomers of NP, OP, NPEO, OPEO	Nonylphenol (NP) Octylphenol (OP) Nonylphenol Ethoxylates (NPEO) Octylphenol Ethoxylates (OPEO)	NP, OP: <10 mg/kg (sum) (10 ppm) NP, OP, NPEO, OPEO: <100 mg/kg (sum) (100 ppm)	China	GB/T 14272-2021 (Down Garment) FZ/T 73005-2021 (Low Wool Content and Wool-Like Knitting Goods) FZ/T 73018-2021 (Wool Knitting Goods)	Textile: GB/T 23322 Down: GB/T 14272-2021 Clause 5.6.2	China: FZ/T 73009-2021 (Cashmere Knitting Goods)	Updated China Product Standards to 2021 version in which AP (NP, OP) and APEO (NPEO, OPEO) are added. New proposal: Morocco: Legislation 00.9.0000 Textile and leather materials in textile articles. Limit: 100 ppm sum of NPEO and OPEO

Dioxins & Furans							
CAS Number	Chemical Name	Restriction /Maximum Limit on Final Product or Tested Component	Country	Regulation	Test Method	Other Countries, U.S. States that also Regulate this Substance	Comments
Group 1			Germany	§ 3 Abs 2, Anlage 1 Eintrag 2 ChemikalienverbotsVO	USA: EPA 8290 (industry practice-not specified by the regulation)		
1746-01-6	2,3,7,8- Tetrachlorodibenzo-p-dioxin	Sum of Group 1: 1 µg/kg (1 ppb)					
40321-76-4	1,2,3,7,8- Pentachlorodibenzo-p-dioxin						
51207-31-9	2,3,7,8-Tetrachlorodibenzofuran						
57117-31-4	2,3,4,7,8-Pentachlorodibenzofuran						
Group 2							
19408-74-3	1 ,2,3,7,8,9-Hexachlorodibenzo-p-dioxin	Sum of Group 1 & 2: 5 µg/kg (5 ppb)					
39227-28-6	1,2,3,4,7,8-Hexachlorodibenzo-p-dioxin						
57117-41-6	1,2,3,7,8- pentachlorodibenzofuran						
57117-44-9	1,2,3,6,7,8-Hexachlorodibenzofuran						
57653-85-7	1 ,2,3,6,7,8-Hexachlorodibenzo-p-dioxin						
60851-34-5	2,3,4,6,7,8-Hexachlorodibenzofuran						
70648-26-9	1,2,3,4,7,8-Hexachlorodibenzofuran						
72918-21-9	1,2,3,7,8,9-Hexachlorodibenzofuran						
Group 3							
3268-87-9	1,2,3,4,6,7,8,9-Octachlorodibenzo-p-dioxin	Sum of Groups 1, 2 & 3: 100 µg/kg (100 ppb)					
35822-46-9	1,2,3,4,6,7,8-Heptachlorodibenzo-p-dioxin						
39001-02-0	1,2,3,4,6,7,8,9-Octachlorodibenzofuran						
55673-89-7	1,2,3,4,7,8,9-Heptachlorodibenzofuran						
67562-39-4	1,2,3,4,6,7,8-Heptachlorodibenzofuran						
Group 4							
109333-34-8	1,2,3,7,8-Pentabromodibenzo-p-dioxin	Sum of Group 4: 1 µg/kg (1 ppb)					
131166-92-2	2,3,4,7,8-Pentabromodibenzofuran						
50585-41-6	2,3,7,8-Tetrabromodibenzo-p-dioxin						
67733-57-7	2,3,7,8-Tetrabromodibenzofuran						
Group 5							
107555-93-1	1,2,3,7,8-Pentabromodibenzofuran	Sum of Groups 4 & 5: 5 µg/kg (5 ppb)					
110999-44-5	1,2,3,4,7,8-Hexabromodibenzo-p-dioxin						
110999-45-6	1,2,3,6,7,8-Hexabromodibenzo-p-dioxin						
110999-46-7	1,2,3,7,8,9-Hexabromodibenzo-p-dioxin						

Disperse Dyes							
CAS Number	Chemical Name/Color Index Name	Restriction /Maximum Limit on Final Product or Tested Component	Country	Regulation	Test Method	Other Countries, U.S. States that also Regulate this Substance	Comments
91-22-5	Quinoline	50 mg/kg (50 ppm)	EU	European Union REACH Regulation (EC) No. 1907/2006 Annex XVII entry 72	DIN 54231:2022		
548-62-9	[4-[4,4'-bis(dimethylamino)benzhydrylidene]cyclohexa-2,5-dien-1-ylidene]dimethylammonium chloride; C.I. Basic Violet 3 with ≥ 0,1 % of Michler's ketone (EC no. 202-027-5)	50 mg/kg (50 ppm)	EU	European Union REACH Regulation (EC) No. 1907/2006 Annex XVII entry 72	DIN 54231:2022		
2475-45-8	Disperse Blue 1	50 mg/kg (50 ppm)	EU			Morocco: NM 09.0.000 2025 Textile and clothing products. Test under NM ISO 16373-2.	
569-61-9	Benzenamine, 4,4'-(4-iminocyclohexa-2,5-dienylidenemethylene)dianiline hydrochloride; C.I. Basic Red 9	50 mg/kg (50 ppm)	EU				
12222-75-2	Disperse Blue 35	Not Detected (below detection limits - see test method)	Germany	German Food, Feed and Commodities Law §30 (LFGB §30)	DIN 54231:2022	South Korea (applicable to babywear, children's wear and adult underwear) - limit of 50 mg/kg United Arab Emirates (Cabinet Resolution No (54) of 2019: 30 ppm in textiles for Acid Red 26, Basic Red 9, Direct Black 38, Direct Blue 6, Direct Blue 28, Disperse Blue 1, Disperse Yellow 3 India: IS 17011:2018 Chemical requirements for Footwear and footwear materials. Limits: 1 mg/L. Test under Indian law is IS 16914 Parts 2 and 3. Morocco: NM 09.0.000 2025 Textile and clothing products. Test under NM ISO 16373-2.	Paragraph 30 in Germany says that the product should not harm the user, and the interpretation of the authority is that disperse dyes have certain effects on the human skin. Industry practice, aligning with the UAE, is 30 ppm.
12223-01-7	Disperse Blue 106				KS K 0736:2024		
13301-61-6	Disperse Orange 37/59/76						
2475-45-8	Disperse Blue 1						
2832-40-8	Disperse Yellow 3						
2872-52-8	Disperse Red 1						
61951-51-7	Disperse Blue 124						
730-40-5	Disperse Orange 3						

Disperse Dyes

[illegible]

Disperse Dyes							
CAS Number	Chemical Name/Color Index Name	Restriction /Maximum Limit on Final Product or Tested Component	Country	Regulation	Test Method	Other Countries, U.S. States that also Regulate this Substance	Comments
Carcinogenic Dyes*							
1937-37-7	Direct Black 38	Prohibited	Egypt	ES 7266-4/2023	DIN 54231:2022	Morocco: NM 09.0.000 2025 Textile and clothing products 50 ppm in textile articles for Solvent Yellow 1, Solvent Yellow 2, Direct Brown 95, Solvent Yellow 3, Acid Violet 49, Basic Blue 26, Solvent Blue 4, 4,4'-Bis(dimethylamino)-4''-(methylamino)trityl alcohol. The following are not included in the scope: Acid Red 26 and Basic Violet 14 Test under NM ISO 16373-2.	* Carcinogenic is not used as a description of a sub category of dyes (Although IS 17011:2018 uses the same category descriptor) • The term appears in the Egyptian law restricting the use of carcinogenic dyes in clothing & textiles
2475-45-8	Disperse Blue 1						
2602-46-2	Direct Blue 6						
2832-40-8	Disperse Yellow 3						
3761-53-3	Acid Red 26						
569-61-9	Basic Red 9						
573-58-0	Direct Red 28						
632-99-5	Basic Violet 14						
82-28-0	Disperse Orange 11						

Flame Retardants

REMARK: A few US states restrict an entire class of Flame Retardant [FR] chemicals such as Nevada FR bill (AB 97) restricts Organohalogenated Flame retardants in children's products and Maryland FR Bill (SB447) restricts FRs in Juvenile products that are Organohalogenated, FRs that contain Phosphorous element, and FRs that contain Nitrogen element. For such FR laws, since there is no list of FR chemicals provided in the bill, it is recommended to work with your suppliers on identifying active FR chemical with the help of MSDS document and make sure active FR chemicals are not within the restricted class of FRs. FRs can still be used for other purposes (e.g. as plasticizers.) Additionally, one can also utilize screening test to identify specific element or group of elements such total halogen screening.

CAS Number	Chemical Name	Restriction /Maximum Limit on Final Product or Tested Component	Country	Regulation	Test Method	Other Countries, U.S. States that also Regulate this Substance	Comment
Various	Halogenated, Phosphorus, Nitrogen, or Nanoscale Flame Retardants	1000 ppm	California, Maryland, USA	Md. Code Regs. 10.19.08.03 (SB0447 and amendments) California Business and Professions Code Division 8, Chapter 3 Home Furnishing, Article 5.5 Juvenile Products, Upholstered furniture and Mattress §§ 19100 - 19104		Minnesota and Nevada (Organohalogenated flame retardants in children's products)	Applicable to "Juvenile products" : consumer product intended for use by a child under the age of 12 years.
115-96-8	Tris(2-chloroethyl) phosphate (TCEP)	Prohibited for consumer products intended for Children under 3 years of age	New York, USA	Environmental Conservation Law Sections 37-0701 to 37-0709	Solvent extraction and analysis by GC-MS or LC-MS (industry practice - not specified by the regulation)	Canada, EU, Maryland, and Delaware	Maryland ban above 1000 ppm by mass on TCEP in childcare products. New York ban applies to consumer products, such as baby products, toys, car seats, nursing pillows, crib mattresses, and strollers for intended for use by a child under three years of age. European Union REACH Regulation (EC) No. 1907/2006 Candidate List The Canada requirement is only applied for children's products (< 3 years) made of polyurethane foam. Delaware bans above 1000 ppm of this FR in Children products designed for residential use by infants and children under 12 years old such as booster seats, changing pads, children's nap mats, floor play mats, highchair pads, infant carriers, infant seats, etc.
5436-43-1, 40088-47-9	Tetrabromodiphenyl ether (TetraBDE)	10 ppm	EU and Switzerland	POP regulation and in Switzerland: ORRChem textiles annex 1.1 (Art.3)	ISO 17881-1:2016	Australia (see comment) New Zealand	Limit for EU (POP EU 2019/1021 amended by EU 2025/1482) is Sum of TetraBDE, PentaBDE, HexaBDE, HeptaBDE and DecaBDE < 10 ppm. For recycled materials, the limit is < 350 ppm which will lower to < 200 ppm in 2027. For childcare articles with recycled materials, the limit is <350 ppm and will go down to <10 ppm as of 27 May 2027. Limit for Australia (Industrial Chemicals Environmental Management (Registry))

Flame Retardants

For such FR laws, since there is no list of FR chemicals provided in the bill, it is recommended to work with your suppliers on identifying active FR chemical with the help of MSDS document and make sure active FR chemicals are not within the restricted class of FRs. FRs can still be used for other purposes (e.g. as plasticizers.) Additionally, one can also utilize screening test to identify specific element or group of elements such total halogen screening.

CAS Number	Chemical Name	Restriction /Maximum Limit on Final Product or Tested Component	Country	Regulation	Test Method	Other Countries, U.S. States that also Regulate this Substance	Comment
32536-52-0	Octa-bromodiphenyl ether (octaBDE)	≤ 0.1% by weight (1000 ppm)	EU	European Union REACH Regulation (EC) No. 1907/2006 Annex XVII	Solvent extraction and analysis by GC-MS or LC-MS (industry practice - not specified by the regulation)	USA, Switzerland, South Korea (KC Mark, for more information review Appendix II) Australia- EU (see comment)	South Korea requirement applicable only to bedclothes and nightclothes among underwear [applicable to textile products for babies, children and adult, and textile bedding] Limit for Australia (Industrial Chemicals Environmental Management (Registry) Instrument 2022 and its amendment, schedule 7): sum of tetra-, penta-, hexa-, hepta-, octa-, nona- and decaBDE: ≤ 500 ppm
126-72-7	Tris (2,3-dibromopropyl) phosphate (TRIS)	Prohibited	EU	European Union REACH Regulation (EC) No. 1907/2006 Annex XVII	Methanol extraction and analysis by LC-MS or GC-MS (industry practice - not specified by the regulation)	Turkey, Switzerland, Japan (see comment), USA, Egypt, South Korea (KC Mark, for more information review Appendix II)	EU requirement applicable to textiles with direct contact with the skin. South Korea requirement applicable only to bedclothes and nightclothes among underwear [applicable to textile products for babies, children and adult, and textile bedding] US requirement applicable to sleepwear Japan requirement applicable to textile products - sleepwear, bedding, curtains and floor mats. From 1 April 2025, the limit will be changed from "not detected" to "8 ppm"
1309-64-4	Antimony trioxide	≤ 1,000 ppm each	Massachusetts, USA	Massachusetts H.4900			Delaware bans above 1000 ppm of this FR in Children products designed for residential use by infants and children under 12 years old such as booster seats, changing pads, children's nap mats, floor play mats, highchair pads, infant carriers, infant seats, etc.

Flame Retardants

REMARK: A few US states restrict an entire class of Flame Retardant [FR] chemicals such as Nevada FR bill (AB 97) restricts Organohalogenated Flame retardants in children's products and Maryland FR Bill (SB447) restricts FRs in Juvenile products that are Organohalogenated, FRs that contain Phosphorous element, and FRs that contain Nitrogen element. For such FR laws, since there is no list of FR chemicals provided in the bill, it is recommended to work with your suppliers on identifying active FR chemical with the help of MSDS document and make sure active FR chemicals are not within the restricted class of FRs. FRs can still be used for other purposes (e.g. as plasticizers.) Additionally, one can also utilize screening test to identify specific element or group of elements such total halogen screening.

PFAS
AAFA has released a state by state side by side of the various state level existing and draft PFAS regulations and requirements. Different states are exploring a variety of restrictions, labeling, and reporting requirements for a variety of products. The most recent version can always be found here: https://www.asafglobal.org/AAFA/Solutions_Pages/US_PFAS_Regulations.aspx

CAS Number	Chemical Name	Restriction (Maximum Limit on Final Product or Tested Component)	Country	Regulation	Test Method	Other Countries, U.S. States that also Regulate this Substance	Comments
U.S. State Requirements:							
Various, defined as a class of fluorinated organic chemicals containing at least one fully fluorinated carbon atom.	Perfluoroalkyl and polyfluoroalkyl substances (PFAS)	< 100 ppm Total Organic Fluorine (intentionally added PFAS prohibited)	California	A.B. 1817		Maine, Colorado, New York, Vermont, Connecticut, Rhode Island, Minnesota, New Mexico, New Hampshire, Illinois	Limit drops to 50 ppm on January 1, 2027. Apparent definition includes footwear. Limited exceptions for PPE, clothing for exclusive use of U.S. military, and other non-apparent specified items, including carpets and rugs. Outdoor apparel for severe wet conditions will be prohibited beginning Jan 1, 2028 if it contains intentionally added PFAS or is at or above 50 ppm TCF. Note: New York PFAS requirements will closely track California requirements, but may be subject to different scope, timelines, and thresholds as a function of the regulatory process. Effective January 1, 2025, New York prohibits intentionally added PFAS in apparel. Effective January 1, 2027, New York prohibits PFAS at or above levels to be established by the state, regardless of whether PFAS was intentionally added. January 1, 2028 prohibits outdoor apparel for severe wet conditions with intentionally added PFAS or at or above levels to be established by the state. Note: Rhode Island takes effect Jan 1, 2027 for juvenile products and textile articles. For outdoor apparel for severe wet conditions with intentionally added PFAS, beginning Jan 1, 2029, must be labeled "Made with PFAS chemicals." Note: Vermont prohibits intentionally added PFAS in juvenile products beginning Jan 1, 2026. For textile articles, beginning Jan 1, 2026, intentionally added PFAS at or above 100 ppm TCF is prohibited, with the limit dropping to 50 ppm in Jan 1, 2027. For outdoor apparel for severe wet conditions, beginning Jan 1, 2028, intentionally added PFAS or at or above 50 ppm TCF is prohibited. Note: Illinois takes effect Jan 1, 2032 for juvenile products and intimate apparel.
International Requirements							
Various	Perfluorooctane sulfonic acid and its derivatives (PFOS)	0.025 ppm (25 ppb) PFOS or any of its salts; 2.1 ppm PFOS-related substance	EU	European Union POPs Regulation (EU) 2019/1021 Annex I		Canada and Norway, Egypt, Switzerland, Turkey, Taiwan	POPs under the Stockholm Convention. The Canadian Environmental Protection Act, 1999 (CEPA 1999), Registration SOR 2006/178 prohibits the manufacture, use, sale, offer for sale and import of PFOS, as well as products containing PFOS. Testing Method: EN 17681-1:2025, EN 17681-2:2022, and EN ISO 23702-1:2023 (leather)
Various	Perfluorooctanoic acid (PFOA), its salts and PFOA-related substance	0.025 ppm (25 ppb) PFOA or any of its salts; 2.1 ppm PFOA-related substance	EU	European Union POPs Regulation (EU) 2019/1021 Annex I		Switzerland, Japan	POPs under the Stockholm Convention Testing Method: EN 17681-1:2025, EN 17681-2:2022, and EN ISO 23702-1:2023 (leather)
Various	Perfluorohexanesulfonic acid (PFHxS) and related compounds	2.35 ppb PFHxS or any of its salts; 2.1 ppm PFHxS-related substances	EU	European Union POPs Regulation (EU) 2019/1021 Annex I		Switzerland and Japan	Testing Method: EN 17681-1:2025, EN 17681-2:2022, and EN ISO 23702-1:2023 (leather). A preliminary or additional measurement of the total fluorine content (TF) according to EN 14582:2016 can be useful to detect intentional use of PFAS and subsequently compare it with results of the target analysis according to EN17681-1:2025
Various	C8-C14 Linear and branched perfluorocarboxylic acids (PFCA) including their salts and related substances	2.35 ppb C8-C20 PFCA or any of its salts; 2.260 ppb C9-C20 PFCA-related substances	EU	European Union REACH Regulation (EC) No 1907/2006 Annex XVII Entry 68		Switzerland	Testing Method: EN 17681-1:2025, EN 17681-2:2022, and EN ISO 23702-1:2023 (leather)
Various	Perfluorohexanoic acid (PFHxA), its salts and PFHxA-related substance	2.35 ppb PFHxA or any of its salts; 2.1 ppm PFHxA-related substances	EU	European Union REACH Regulation (EC) No 1907/2006 Annex XVII, Entry 79			EU REACH Annex XVII Entry 79 - Effective from Oct 10, 2026 for clothing and footwear
Perfluorocarbons (PF-Ca)							
75-73-0	Perfluoromethane - CF ₄	Use Prohibited	EU	European Union Regulation (EU) No 573/2024			To comply with due diligence requirement, document verification is the most effective way of supporting compliance with these legal requirements. Examples include, but are not limited to, declaration of none-use or specific compliance certificates of used chemical.
76-16-4	Perfluoroethane - C ₂ F ₆						
76-19-7	Perfluoropropane - C ₃ F ₈						
355-25-9	Perfluorobutane - C ₄ F ₁₀						
678-26-2	Perfluoropentane - C ₅ F ₁₂						
355-42-0	Perfluorohexane - C ₆ F ₁₄						
115-25-3	Perfluorooctobutane - C ₈ F ₁₈						
EU Member States:							
Various, defined as a class of fluorinated organic chemicals containing at least one fully fluorinated carbon atom.	PFAS: Any substance that contains at least one fully fluorinated methyl (CF 3) or methylene (CF 2) carbon atom, without any hydrogen, chlorine, bromine or iodine atoms bonded to it.	< 50 ppm Total Fluorine	Denmark	Order BEK no. 464 of 10/05/2025- Executive Order on the prohibition of import and sale to consumers of clothing, footwear and certain impregnation agents containing PFAS			Effective July 1, 2026 with a self-through ending January 1, 2027. * The executive order does not cover PFAS in clothing, footwear or waterproofing agents, which are regulated in the following legal acts: (1) Regulation (EC) No 1907/2006 (REACH), as amended. (2) Regulation (EU) 2019/1021 on persistent organic pollutants (POP), as amended. The Order does not cover PFAS that only contain the following structural elements: CF 3, X or X CF 2, X', where X = -OR or -NR2 and X' = a methyl group (-CH 3), a methylene group (-CH 2-), an aromatic group, a carbonyl group (-C(O)-), -OR-, -OR-, -NR-, R-, and where R = H, R' is a hydrogen atom (-H), a methyl group (-CH), a methylene group (-CH2-), or an aromatic group or a carbonyl group (-C(O)-). The prohibition does not apply to: (1) Reuse of clothing or footwear. (2) Recycling of clothing or footwear. (3) Personal protective equipment intended to protect the user against risks as specified in Regulation (EU) 2016/425, Annex I, risk category III (a) or (c). (4) Personal protective equipment whose content of PFAS constitutes a safety function for the consumer. (5) Impregnating agents intended for re-impregnating personal protective equipment mentioned in no. 3 or 4. (6) Medical equipment. (7) Transit goods. * It does not apply if the fluorine content comes from a substance that is not a PFAS (as defined in this order). The Danish Environmental Protection Agency may request documentation for this.
Various, defined as a class of fluorinated organic chemicals containing at least one fully fluorinated carbon atom.	Perfluoroalkyl and polyfluoroalkyl substances (PFAS)	25 ppb for any PFAS as measured with targeted PFAS analysis (polymeric PFASs excluded from quantification) 250 ppb for the sum of PFASs measured as sum of targeted PFAS analysis, optionally with prior degradation of precursors (polymeric PFASs excluded from quantification) 50 ppm total fluorine for PFASs (polymeric PFASs included).	France	LCI n° 2025-168 du 27 février 2025 visant à protéger la population des risques liés aux substances perfluoroalkyles et polyfluoroalkyles amendé by Décret no 2025-1376 du 25 décembre 2025			Note: France exempts second-hand products as well as the following categories: - PPE covered by Regulation (EU) 2016/425 and PPE/Combat equipment intended for the armed forces and waterproofing agents thereof - Technical textiles for industrial uses - Sanitary textiles for medical uses - Products made with 20% or more recycled content. The presence of PFAS must be proportional to the quantity of post-consumer recycled content. There is also a 12-month self-through for products manufactured before January 1, 2026. More guidance may be issued by the French government by Q2 2026.

76	[4-[[4-anilino-1-naphthyl]]4- (dimethylamino)phenyl]methylene]cyclohexa-2,5-dien-1-ylidene] dimethylammonium chloride (C.I. Basic Blue 26)	2580-56-5	
77	N,N,N',N'-tetramethyl-4,4'methylenedianiline(Michler's base)	101-61-1	
78	α,α-Bis[4-(dimethylamino)phenyl]-4 (phenylamino)naphthalene-1-methanol (C.I. Solvent Blue 4)	6786-83-0	
79	Diboron trioxide	1303-86-2	
80	Formamide	75-12-7	
81	Lead(II) bis(methanesulfonate)	17570-76-2	
82	1,3,5-Tris(oxiran-2-ylmethyl)-1,3,5-triazinane-2,4,6-trione (TGIC)	2451-62-9	
83	1,3,5-tris[(2S and 2R)-2,3-epoxypropyl]-1,3,5- triazine-2,4,6(1H,3H,5H)trione) (β-TGIC)	59653-74-6	
84	[4-[4,4'-bis(dimethyl- amino)benzhydylidene]cyclohexa-2,5-dien-1- ylidene]dimethyl ammonium chloride (C.I. Basic Violet 3)	548-62-9	
85	Bis(pentabromophenyl) ether (deca-BDE)	1163-19-5	
86	Pentacosafuorotridecanoic acid	72629-94-8	
87	Henicosafuoroundecanoic acid	2058-94-8	
88	Tricosafuorododecanoic acid	307-55-1	
89	Heptacosafuorotetradecanoic acid	376-06-7	
90	4-(1,1,3,3-tetramethylbutyl)phenol, ethoxylated – covering well defined substances and UVCB substances, polymers and homologues	-	

Appendix I	Reporting: Appendix IA lists SVHC reporting and registration (EU SCIP Database) requirements for the European market that are not necessarily otherwise listed in the RSL. For current SVHC reporting and registration requirements, please visit the following site: https://echa.europa.eu/candidate-list-table		
EU REACH Substances of Very High Concern (SVHC):			
No.	Chemical Name	CAS Number	Limit Triggering Reporting in Article
91	4-nonylphenol, branched and linear – substances with a linear and/or branched alkyl chain with a carbon number of 9 covalently bonded in position 4 to phenol, covering also UVCB and well-defined substances which include any of the individual isomers or a combination thereof	-	
92	Diazene-1,2-dicarboxamide (C,C'- azodi(formamide))	123-77-3	
93	Cyclohexane-1,2-dicarboxylic anhydride(Hexahydrophthalic anhydride- HHPA)cis-cyclohexane-1,2-dicarboxylic anhydride trans-cyclohexane-1,2-dicarboxylic anhydride(The individual cis- and trans- isomer and all possible combinations of the cis- and trans-)	85-42-7, 13149-00-3, 14166-21-3	
94	Hexahydromethylphthalic anhydride, Hexahydro-4-methylphthalic anhydride, Hexahydro-1-methylphthalic anhydride, Hexahydro-3-methylphthalic anhydride	25550-51-0, 19438-60-9, 48122-14-1, 57110-29-9	
95	Methoxy acetic acid	625-45-6	
96	1,2-Benzenedicarboxylic acid, dipentylester, branched and linear	84777-06-0	
97	Diisopentylphthalate (DIPP)	605-50-5	
98	N-pentyl-isopentylphthalate	776297-69-9	
99	1,2-Diethoxyethane	629-14-1	
100	N,N-dimethylformamide; dimethyl formamide	68-12-2	
101	Dibutyltin dichloride (DBT)	683-18-1	
102	Acetic acid, lead salt, basic	51404-69-4	
103	Basic lead carbonate (trilead bis(carbonate)dihydroxide)	1319-46-6	
104	Lead oxide sulfate (basic lead sulfate)	12036-76-9	
105	[Phthalato(2-)]dioxotrilead (dibasic lead phthalate)	69011-06-9	
106	Dioxobis(stearato)trilead	12578-12-0	
107	Fatty acids, C16-18, lead salts	91031-62-8	
108	Lead bis(tetrafluoroborate)	13814-96-5	
109	Lead cyanamate	20837-86-9	
110	Lead dinitrate	10099-74-8	
111	Lead oxide (lead monoxide)	1317-36-8	
112	Lead tetroxide (orange lead)	1314-41-6	
113	Lead titanium trioxide	12060-00-3	
114	Lead titanium zirconium oxide	12626-81-2	
115	Pentalead tetraoxide sulphate	12065-90-6	
116	Pyrochlore, antimony lead yellow	8012-00-8	
117	Silicic acid, barium salt, lead -doped	68784-75-8	

Appendix I	Reporting: Appendix IA lists SVHC reporting and registration (EU SCIP Database) requirements for the European market that are not necessarily otherwise listed in the RSL. 102	Nickel Compounds		NA				✓	

* Maine notes CAS no. are specific for the parent chemical, but the CHC listing includes the parent chemical and parent chemical-related salt compounds.

Appendix III	Labeling: Appendix II lists regulations which have a labeling requirement that are not necessarily otherwise listed in the RSL.						
CAS Number	Chemical Name Name	Restriction / Limit Triggering Labeling in Component	Country	Regulation	Test Method [detection limit] if any	Other Countries/States Which Also Require Labeling	Comment
50-00-0	Formaldehyde (0 - 36 months)	20 ppm	South Korea	Safety Quality Mark Act (KC Mark)			
	Formaldehyde (≥ 36 months to ≤ 13 years)	75 ppm (innerwear / midwear), 300 ppm (outerwear); All Children's' products: Max 75 ppm					
various	Azo Dyes	30 ppm					
56573-85-4	Tributyltin (TBT)	0.5ppm for infant's 1.0 ppm for Children's					
1002-53-5	Dibutyltin (DBT) (0 - 36 months)	1 ppm					
624-49-7	Dimethyl Fumarate	0.1 ppm					
117-84-0	Di-n-octyl phthalate (DNOP)	0.1% (1000 ppm)	South Korea	Safety Quality Mark Act (KC Mark)			Phthalates requirement in KC Mark: Baby products (0-36 months): 0.1% (sum of DEHP, DBP, BBP, DIBP, DIDP, DINP, DNOP) Children product (≥ 36 months to ≤ 13 years): 0.1% (sum of DEHP, DBP, BBP, DIBP)
117-81-7	Di (2-ethylhexyl) phthalate (DEHP)						
85-68-7	Benzyl Butyl phthalate (BBP)						
84-74-2	Di-n-butyl phthalate (DBP)						
84-69-5	Di-isobutyl phthalate (DIBP)						
68515-48-0	Di-isononyl phthalate (DINP)						
68515-49-1	Di-isodecyl phthalate (DIDP)						
32534-81-9	Penta-bromodiphenyl ether (pentaBDE) (0 - 12 years)	Not Detected					
32536-52-0	Octa-bromodiphenyl ether (octaBDE) (0 - 12 years)						
68112-30-1	TDBPP (0 - 12 years)						
various	Disperse Dyes	Not Detected	South Korea	Safety Quality Mark Act (KC Mark)			Disperse dyes only applies to baby product, children and innerwear
7439-92-1	Lead (Pb) (< 6 years)	40 ppm - 100ppm (lead in substrate) 40 ppm - 90ppm (lead in coating)	Illinois, USA	Lead Poisoning Prevention Act			Toys with paints, child care articles, children's jewelry
	NP/NPEO	100ppm (sum)	South Korea	Safety Quality Mark Act (KC Mark)			applies to-infant and childrens textile products (0-13 years)

Appendix III Labeling: Appendix II lists regulations which have a labeling requirement that are not necessarily otherwise listed in the RSL.							
CAS Number	Chemical Name Name	Restriction / Limit Triggering Labeling in Component	Country	Regulation	Test Method [detection limit] if any	Other Countries/States Which Also Require Labeling	Comment
Various	PFAS Chemicals	intentionally added	Connecticut, Colorado, Illinois, Indiana, Maine, New Hampshire, Rhode Island	Connecticut: SB 292 Colorado: SB 24-081 Indiana: HB 1341 New Hampshire: HB 1352 Rhode Island: S 2152 Vermont: S. 20 Washington: Chapter 173-337 WAC Maine: Public Law c.477 Minnesota: HF 2310/ SF 2483			Notification of customer required for firefighting personal protective equipment. Note: Other reporting requirements for intentionally added PFAS in products are contained within AAFA's State PFAS Tracker.
Various	Biocidal Active Substances	Articles treated with biocidal products must contain only EU-approved active substances when the treatment is intentional and the substance is present to achieve a biocidal effect. Suppliers must provide consumers with information on the active substance within 45 days, free of charge. When biocidal properties are claimed, the product must be labelled in accordance with CLP Regulation (EC) No 1272/2008 and the additional requirements of the Biocidal Products Regulation.	EU	Regulation (EU) No. 528/2012 (the Biocidal Products Regulation)			US: Under FIFRA, products cannot make public-health pesticidal claims unless they are EPA-registered or exempt. Canada: Products used to manage or repel pests must be registered with Health Canada's PMRA. Antimicrobial preservatives used in treated articles must come from the approved (registered) list, and any claims must match the preservative's approved label.

Change Log from RSL 25 to RSL 26	
CAS and Chemical Search	Added search function that pulls all table information by either chemical name or CAS number
All Data	Added single tab that contains all data for ease of consolidated information and to enable the new search function to work
APEO AP	Minor grammatical changes.
Arylamines	Clarified Vietnamese restriction of AZO dyes and Formaldehyde.
Dioxins and Furans	Clarified German regulation of Dioxins and Furans
Disperse Dyes	Updated test method for quinoline, added Moroccan and Indian regulations of various disperse dyes. Clarified the regulatory text of LFGB §30 in Germany and its interpretation.
Flame Retardants	Amended the introductory remark to clarify that flame retardants can be used for other purposes (e.g. plasticizers). Made New York State the lead restriction for TCEP and clarified the scope to apply to children under 3 years of age. Updated the restriction of the sum of Tetra-, Penta-, Hexa-, Hepta-, and DecaBDE under POP regulation in the EU.
Formaldehyde	Amended the scope to clarify the relevant age ranges.
Heavy Metal (Extractable)	Specified the relevant age ranges for restrictions across all extractable heavy metals. Included Egyptian regulation on textiles and updated the Saudi Arabian regulation year. Included restrictions on accessories from Egypt.
Heavy Metal (Soluble)	Specified the age ranges for Taiwanese and South Korean soluble heavy metal restrictions. Included the regulation year in Taiwan and specified the KC Mark Standards. Added soluble Chromium and removed Mercury.
Heavy Metal (Total)	Specified the scope of Minnesota's regulation of total lead. Added in test method years across the board. Updated the Chinese regulation to GB 30585-2024 and therefore removed total Arsenic from the table. Specified age range for Washington State.
Misc.	Clarified REACH restriction of navy blue for colouring textiles and leather. Updated regulation dates and the test method for N-Nitrosamines. Removed PFC section to PFAS tab for clarity.
Organotin Compounds	Updated ISO 16179 to 2025 version. Specified that South Korean test method is required for approval under KC Mark.
PAH	Clarified scope of EU vs Taiwanese PAH regulations
Pesticides	Made significant changes in clarifying which jurisdictions jointly or separately regulate the pesticides across the Swiss, EU, and Canadian regulations. Added TriCP regulation in Egypt and Morocco. Clarified Chinese regulation of PCP. Removed pentabromobenzene from the list.
PFAS	Updated US State PFAS restrictions to clarify which states had the most restrictive regulations. Added in new EU PFAS test. Updated the table with both PFAS restrictions from both France and Denmark. Added in PFCs to the section. Updated to include long-chain PFCAs.
Phthalates	Updated with Chinese footwear and textile regulation of phthalates. Clarified the restriction jurisdictions.
Solvents	Made EU and Egypt co-lead restrictions for DMAC and DMF.
Appendix I - Updated SVHC	Added 4 additional entries to SVHC list
Appendix II - US States	Updated SVHC comparison section to reflect addition of Decabromodiphenyl ethane
Appendix III: Labeling	Specified the age range for the labeling of formaldehyde in South Korea. Changed the limit for penta- and octaBDE and TDBPP to Not Detected for South Korean labeling. Moved all relevant PFAS labeling information from PFAS tab to Labeling tab and updated with newly
